Natural Beach Sand

FDEP/ACOE Approved Mine

Domestic upland source of natural sand

Serving Dade, Broward & Monroe Counties

35,000,000 tons of permitted reserves

FDOT Mine #: 87-648

FDEP/ACOE approved mine

Composed of quartz and calcium carbonate

SDI Quarry operates a FDOT approved mine providing natural beach sand for beach renourishment and restoration projects. We are a FDEP/ACOE permitted domestic upland source of sand located in South Florida.

All of our beach sand is a natural occurring mixture of quartz and calcium carbonate. Its physical properties conform to the specifications set forth by FDEP/ACOE. Our typical beach sand test results are as follows:

Mean Grain Size (mm)	0.30 - 0.55
Silt Content (passing #230 sieve)	< 5%
Coarse Grain (retained #4 sieve)	< 5%
Color Dry (Munsell Value)	2.5Y 8/1
Color Wet (Munsell Value)	10 YR 8/1

Please call or email for questions on project specific pricing, quantity and specification requirements
